**121**

ENERGY PROJECTS  
HAVE BEEN FUNDED  
VIA ENERGY CROWD  
FUNDING PLATFORMS

*“The UK’s global financial and related professional services leadership and its wide-ranging ecosystem means that it is well-placed not only to offer **the whole range of green finance products and services**, but also to demonstrate and promote this proposition...”*

*“One critical feature of the further development of the green finance sector will be the increasing recognition that green financial instruments offer **a compelling business and financial proposition** in their own right, **separate from the positive social and environmental benefits they offer.**”*
