Dr. Francesco La Camera, Director General  
Directorate for Sustainable Development,  
European Union and International Affairs  
Ministry for the Environment, Land and Sea  
Republic of Italy  
Via Cristoforo Colombo 44, 00147  
Rome, Italy

Dear Director General,

**Re: Implementation of the Saint Lucia e-geos Early Warning System (EWS)**

At the recently held JCA Meeting at the Italian UN Mission in New York, it was announced that the e\_geos EWS proposal for Saint Lucia was approved for implementation. Further, that the 5Cs would be the Implementing Agency for the project. Subject to confirmation by IMELS the following implementation process for the project is being recommended:

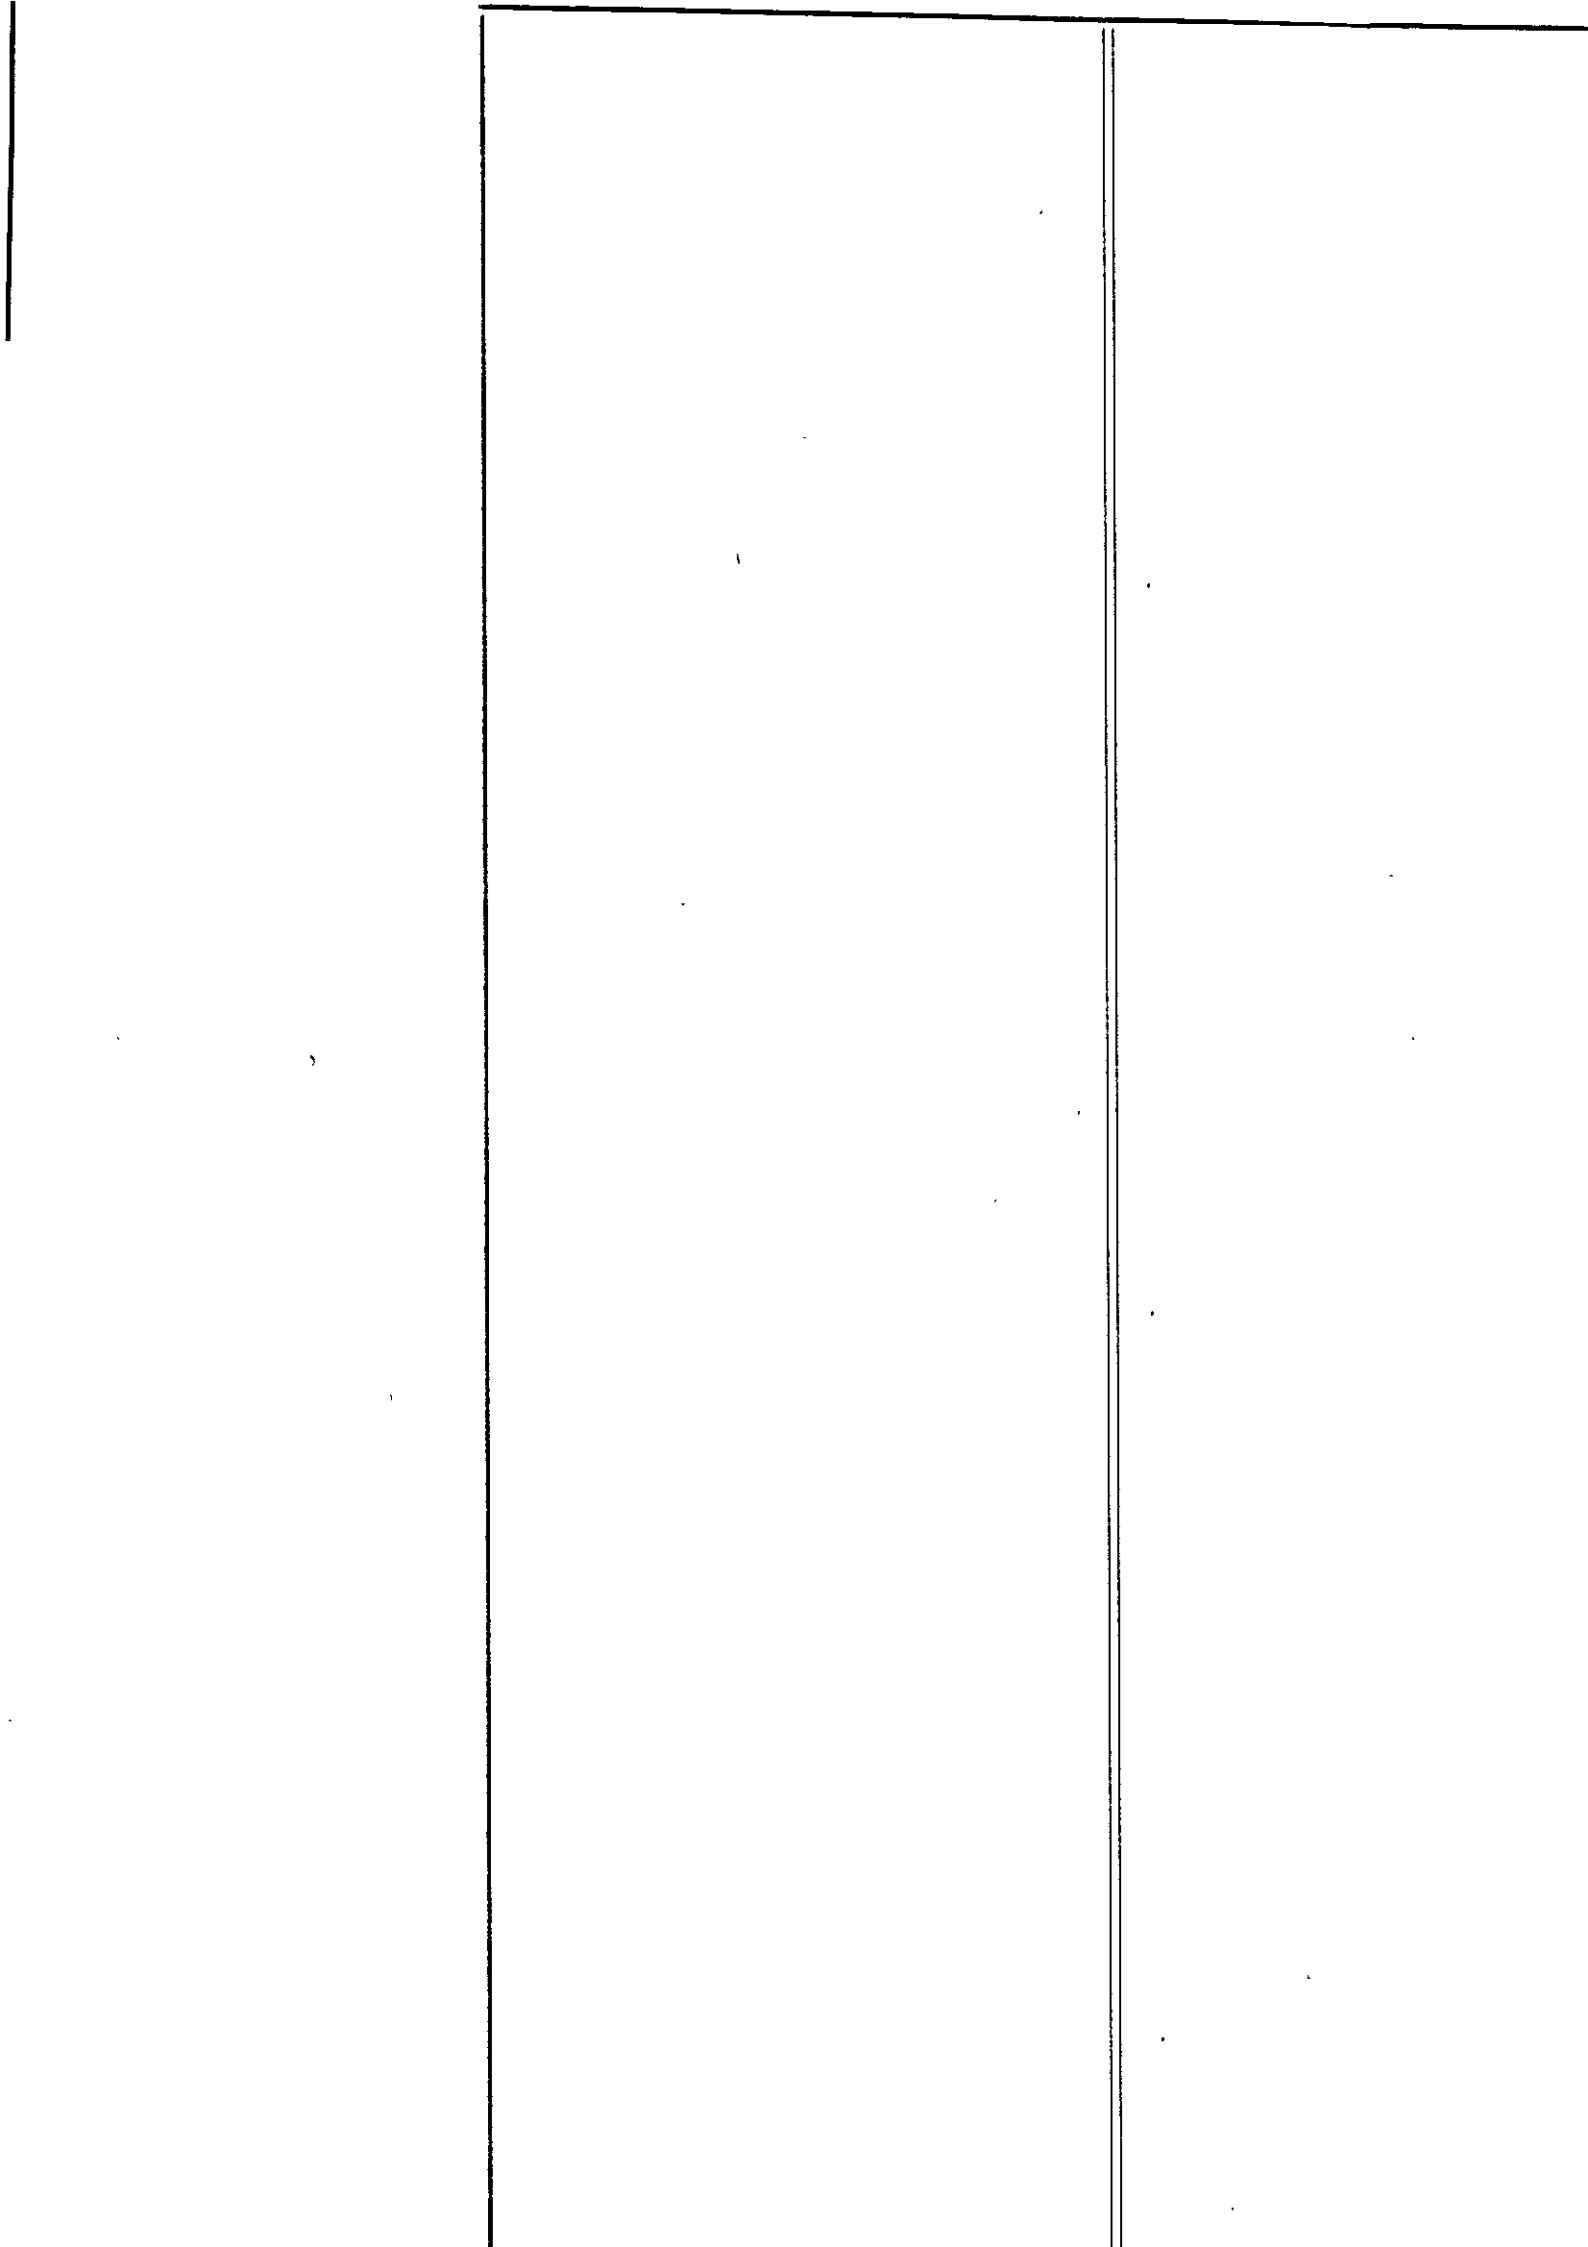

1. IMELS will confirm that the 5Cs has been appointed to implement the project and as such:
  - a. IMELS and 5Cs will agree on the financing process of the project and the schedule for the transfer of funds for the implementation of the project.
  - b. IMELS and 5Cs agree on a management plan for the implementation of the project.
2. 5Cs will be responsible to finalize a Procurement Agreement with e-geos, based on their proposal submitted to the Centre and approved by IMELS and the Government of Saint Lucia for:
  - a. Design, fabrication, delivery and installation of the system in Saint Lucia on the schedule in the proposal.
  - b. The cost of the system is as presented in the proposal.
3. The 5Cs will be responsible to coordinate with the Government of Saint Lucia the launch of the project and the role of the Government stake holder departments in the execution of the project.

I look forward to your usual positive and prompt response to the above recommendations in order that implementation can begin as soon as possible.

Sincerely,

Kenrick Leslie, Ph.D, CBE  
Executive Director
