Environmental Damage, European Union  
and International Affairs

Director General

Dr. Kenrick Leslie

Executive Director of  
Caribbean Community  
Climate Change Centre (5Cs)

k.leslie@sbcglobal.net

Dear Kenrick,

With reference to your letter of 8 November 2018 (our reference n. 11027 of 13 November 2018), I would like to confirm our support to the project "*Completing the Operationalization of the Caribbean Community Climate Change Centre Airborne LIDAR System*". I believe that the proposed project is coherent with the initiatives developed under the programme that the Italian Ministry for the Environment, Land and Sea has in place with the CARICOM countries. In particular, it will complement the Early Warning System project in Saint Lucia, enabling better disaster risk management.

The request for the first disbursement is therefore approved. The following tranches will be made after receipt of a written request by 5Cs to IMELS and a progress technical and financial report on the use of the previous payment.

Best regards,

Francesco La Camera
